Ajinkya Tambade

Full Stack Web Developer

I have honed a solid foundation in programming methodologies, and system analysis. Complementing my academic pursuits, I have dedicated myself to mastering the art of full stack web development through self-learning and hands-on projects.

Projects

E-Suvidha

Nov 2023 - March 2024
- E-Suvidha is a comprehensive web application I developed to streamline and digitize essential citizen services. Leveraging the MYSQL, Angular, JavaScript, Java, this full-stack project aims to provide a user-friendly and efficient platform for residents to access and manage various services seamlessly.

TFLAssessment

Jan 2024 - Present
- Creating an online examination platform involves a multifaceted approach to design, development, and implementation. The project encompasses various crucial components, including user authentication, exam creation and management, intuitive user interfaces, secure exam delivery mechanisms, automated scoring and feedback systems, stringent security measures, accessibility considerations.

TFLPortal

Feb 2023 - Present
- Transflower Portal is a intranet application built as learning project to apply technology learning. This project work helps to understand complete end to end Software Development process using Agile Methodolgy. The main purpose of this activity is to learn technologies by doing hands on. We could learn and apply skills of Software Development to build FullStack .NET Developer Skill.
